Pursuant to 26 Del. C. §§201 and 301 and Order No. 8701 (January 6, 2015) in PSC Docket No. 13-349F, Delmarva Power & Light Company ("Delmarva") has filed an application (the "Application") with the Delaware Public Service Commission (the "Commission") seeking to change the methodology for calculating the balancing fees associated with the Gas Cost Rate ("GCR"). More specifically, Delmarva requests permission to implement a new structure for the imposition of balancing fees that would consist of two components, a Balancing Fee and a Pressure Support Fee. The Balancing Fee and Pressure Support

Fee contained in the Application would result in an overall bill increase of between .05% to 30.5% depending on tariff class and fee structure approved. See Schedule SAD-4 of the Application for more information.

The demand rate for Residential Gas, General Gas, Gas Light, Medium Volume and Large Volume customers would decrease by approximately 8.0%. The effect of the proposed Balancing Fee and Pressure Support Fee on a residential space heating customer using 120 ccf in a winter month would be a decrease in their overall bill of \$1.75, or 1.4%.

The Commission will conduct evidentiary hearings, to be scheduled at a later date, concerning this Application. The Commission's final decision will be based on the evidence presented at such hearings.
